
On reading your plan, I must first of all say it wasn't very clear on many points. However I did understand the following:

Tall Buildings (High Rise Flats). I am completely against this proposal as they do not cater for the needs of families. It is the case that many children suffer from mental problems due to the fact that nearly all flats that are built, do not have outside space for children to play. Also a virus such as Covid, is far more easily spread in flats, ie lifts, closed in corridors, etc. many people in houses for the same cost as building a high rise.

The proposed plan to build high rise flats within the Towns precinct is complete madness and I disagree with this plan whole heartedly.

Crews Hill I am against any of this area being changed. It provides work and income for local residents and is a well known landmark of Enfield. People come from miles to visit the nurseries. I have even witnessed a coach load of people visit this location.

Green Belt I am totalling against this idea, especially as we have:::

Meridian Way supplying 10,000 homes
Colosseum supplying 1800
100 Church Street supplying 80
Ross House supplying 280

Enfield has recently lost Highlands Hospital, St. Michaels, and part of Chace Farm to housing. As a resident I feel enough is enough. We are turning Enfield into a concrete jungle and changing it from a Market Town.

I am sorry to I am against the Local Draft Plan
