

---

I am completely against your plan to build 3500 homes on the Green Belt farmland. Enfield invested so much money into cycle lanes in the borough to cut down motorists driving and reduce the carbon footprint, yet here you are now trying to fill something so sacred as Green Belt with homes and no doubt hundreds of more drivers. Has the Covid 19 lockdown not taught people the value and importance of our special Green Belt areas? We need to protect our Green Belt areas and preserve them for future generations.

Enfield Resident
