

---

The local plan proposes high rise tower blocks in various locations within the borough. I object to this as tower blocks provide sub optimal environments for children to grow up in. Tall buildings are not in keeping with the traditional design of Enfield and many of the newer tall buildings that have already been built near Southbury road station are an eyesore.

I object to building on green belt land and the implications this might have in terms of flooding (much of this land provides a rain soak).

Thank you
