

---

As residents of nearly 20 years in Fords Grove N21 and over 30 in Enfield I am appalled that what was once proudly noted as the greenest borough in London is nearly unrecognisable since the insensitive and frankly insane schemes for development and urbanization, that on the whole have been approved through stealth rather than consultation since this Council has been in place. My own road has seen congestion, accidents, pollution and crime increase since the allowance of shoddy buildings, changes of use and non rate paying cash businesses being allowed to pop-up, in the main due to the unconsulted or ignored negative feedback, for the changes to the free parking: the cycle lanes; development right on top of us: the Green pedestrianization. Not only is the system at the top of Fords Grove inappropriate for use due to the BUSES, the illegal parking, the rubbish on the walkways and the dangerous entrance on top of the bridge but the river is constantly polluted and blocked, animals killed or poisoned due to the lack of care and attention given to this area, which never used to be the case. We strongly object to the loss of more green space and would be forced to move as standards and attitudes seem to have slipped in this area over recent times.
