

---

Dear sir/madam.

The save enfield leaflet posted my door just yesterday.

I agree the need for more housing ,but have all these plans been thought through properly?.

The present infrastructure as it is now cant cope with the amount of traffic .

The present road, transport system is under more strain at peak times.

The roads near crews hill are most inadequate for these plans, public transport is largely non existent apart from the 456 bus . There are no super markets there ,schools etc, public transport.

Enfield town infrastructure is simply unable to cope with as it is now for these plans .

I think before any building is approved the roads , transport system around enfield needs to be planned properly and developers not just cashing on profits .
