

---

I wish to state that I categorically object to plans to build flats on Ford's Grove car park.

There is very little parking in Winchmore Hill as it is and this will cause even more damage to local shops and businesses .

I live on Ford's Grove. When you introduced car park charges (when it had been free), all that has happened is that cars simply park bumper to bumper on the road during the week to avoid them.

Your plans to get revenue out of that clearly didn't work !

If you build on the car park there certainly won't be any room for cars that are currently forced to use it due to lack of spaces on the road. Also there is the question of where will the residents of these proposed flats going to park?

The council is squeezing the life out of Winchmore Hill and is putting huge pressure on drivers and local shop owners as it is

The LTN in Fox Lane is causing gridlock forcing all traffic onto one route .This of course produces much more pollution with cars stuck in traffic, particularly on Palmers Green High Street, the one thing you are saying you wish to cut. Also journeys are often longer as a result and more costly due to petrol - guzzling delays.

Yet again it affects businesses which you clearly do not care about judging by the number of business that have already had to close due to the effect of the cycle lanes.

Those cycle lanes that you inflicted on us were hugely expensive and only a tiny number of cyclists actually use them. Drivers are stuck in single lane traffic and as a result , their idling engines emit even more pollution.

The only conclusion to come to is that you are continuing your war on drivers with this latest idea.

I cannot believe you are even considering this project.

I am utterly opposed to it
