Here are my views regarding "Future Enfield"

We are already suffering in Enfield because of the masses of people that now live in the area.

Our hospitals, doctors and other health care providers are already under pressure trying to cope. These extra properties would have a devastating effect on these much needed services. We have already seen the vast amount of houses and flats that have already been built over the last few years, (so many on chase farm site included) These properties mean more people, more cars, more traffic, more water, sewage, electricity etc etc...

Apart from the above, and as we all now know, the devastation of climate change, and as a Council body, you should be more aware of this than most!

Our wildlife is suffering because of what you have already let happen, by taking away their habitat, and this in turn is affecting our own health and wellbeing.

It is both appalling and sickening to think of the devastation that lies ahead if Enfield Council does not STOP NOW!!

Yours sincerely
