

---

Redevelopment of supermarket and car park to mixed-use homes and non-residential floor space.

- I find it hard to believe that an essential feature of the local community should be taken away for a housing development.
- We do not have a car, in part due to local road restrictions, are you suggesting we acquire one in order to do the weekly shop? Adding to more traffic and pollution in an already congested area.
- No provision has been made for influx of extra people regarding schools, doctors etc.
- A new development will not reflect style of existing architecture.
- We are concerned about the disruption such a construction will have on a congested area, especially regarding the existing cycle lane.
- Over development of the area considering other developments planned including Travis Perkins and Capitol House site.
- It's not in keeping with existing character of the area. It will have a detrimental effect on the desirability of our property.
