I strongly object to the proposed development of Sainsburys Winchmore Hill for housing. How are local elderly people supposed to cope with regards to their food supplies? How are we to help climate change by having to drive further for our shopping. When planning permission was granted for Sainsburys it was on the condition that the green belt was retained for community use.

What is being put in place to cope with the extra demand on our doctors surgeries, hospital facilities, dental surgeries, schools...the list goes on.
