
I object most emphatically at the plan to build on our green belt as it is totally against all ethical matters in preserving our green environment and not spoiling our area.

This scheme is a travesty and makes no sense in all the efforts to give us all clean air.

Furthermore, I also object on grounds that the addition of all the proposed new residents will cause many problems local ally ,parking, schools, doctors, travel generally (where will the new residents easily have these facilities?)

Yours Truly,
