Dear sir/madam

I am writing to strongly object with the Sainsburys complex on green lanes N21 being turned into a housing area. The impact on the local community will be terrible. Local schools Gp surgeries etc will become overwhelmed. Traffic is awful as it is because of the cycle lanes and various roads blocked off . Add to it a housing complex which will inevitably add to the traffic/pollution. Local people especially the elderly will drive/ walk/ take a bus in order to do their shopping. In addition to this the added traffic /bike lanes have already had an impact on local businesses. Sainsburys currently have a carpark which makes those business doctors surgeries/ dentists accessible. Fords grove carpark will be going so I would like the council to tell us where you expect people to park . The green area surrounding Sainsburys I'm sure have been a life line especially during the pandemic especially for those who do not have gardens .

I urge you to rethink this !
