Response to local plan issues and options consultation

I am writing to you the council to register my views regarding the proposals to build 6000 plus houses on green belt land and Crews Hill.

I have lived in Enfield most of my life and run a landscaping business.

Having read the plan and I am frankly appalled at the lazy, arrogant and short sighted attitude of this council.

To suggest that the only possible way to increase housing stock is to concrete over precious green spaces exposes the vindictive and soulless nature of those involved. I have spoken to many people and am yet to meet anyone who knows the area who thinks this plan anything other than an act of vandalism.

I would like to add that the mind-set that has taken hold in the council is further evident in the ludicrous and borderline insane proposal to allow multi storey buildings in and around Enfield Town, including the old Meta Switch building, which if allowed to go ahead would completely dominate and overwhelm the beautiful conservation area of Gentlemans Row. I feel this shows that the council has no attachment, appreciation or regard for the character and appeal of Enfield and wish to urbanise and destroy what many people love about this area and frankly what attracts people to it in the first place.
