

---

I am writing to object to this proposal to build 160 homes on the meadows near where I live.

I strongly disagree with this plan. It would remove a beautiful green space, something that is very important for the future of our environment.

You must have seen the recent reports of increased flooding in the UK and in Europe. Fields and meadows protect us all from the risk of flooding as a result of extreme weather. Please don't take any of them away and put us all at risk.
