

---

To Whom it may concern,

I am writing to object to the following Policies in the Draft Local Plan:

SP PL10, pages 80-87, and Figure 3.11; Policy SP PL9, pages 77-80 and Concept Plan Figure 3.10; Policy SA45: Land Between Camlet Way and Crescent Way, Hadley Wood, page 364; Policy SA54, page 374; and Policy SA62 page 383 and SP CL4 pages 277-279.

All of those policies propose the re-designation of Green Belt for housing and other purposes. These sites are part of historic Enfield Chase, which is unique in the southeast and played an important role in the development of Enfield. It is a rare and valuable landscape asset and its loss would cause permanent harm not only to the Green Belt, but also to the very character of the borough.

I also object to Policies SA62 page 383 and SP CL4 pages 277-279 because they transfer part of Whitewebbs Park, a public amenity, into private management. I reject the Council's analysis that Whitewebbs Golf Course was losing money and call for its reinstatement.

Furthermore, I object to Policy SA52 page 372, which would remove part of Rammey Marsh, a wildlife area and public amenity, from the Green Belt.

I object to policies that would harm the Green Belt which really is the life-support for our city. I believe that local government should lead and be an example for us all in protecting our nature. Building thousands of homes on the precious Green Belt is like destroying wildlife which is our life support. We really ought to plant more trees and not remove them. My family do our best: recycle, use public transport as much as possible, reuse plastic, etc. To me it is outrageous that our Local Government in Enfield is even considering policies that would contribute to climate change rather than preventing it. As a resident of this beautiful borough I feel this is my duty to do all I can to combat climate change. It is also my duty to strongly object any policies which would harm nature, the Green Belt in particular.

I appeal to anyone who makes decisions to really lead us by example in protecting our natural environment. What is the sense of my making effort in using four different bins to segregate our rubbish or taking time to walk rather than drive, if our local government is planning policies that would advance climate change.
