

---

I am objecting to this proposal as I believe this Sainsbury's supermarket is essential for people, like me, who do not have their own car. It is the only big supermarket I can travel to easily by public transport /walking and I am sure this is the same for a lot of local people.

If this shop was knocked down, I believe it would greatly increase the traffic around Enfield from people driving further to do their shopping. It would reduce facilities for the current residents and there would be no local shopping facilities for any new properties being built. These new residents would all have to drive elsewhere to do their shopping. There is also a lot of green space around the supermarket which is an asset to the community. We need more green areas, not less.  
Please do not take this destructive action.
