

To Enfield Council,

I am disappointed that in an era where it is so important to go green, reduce emissions down to support the losing battle in climate change where the super powers in the world are simply not doing enough, Enfield are proposing to build in green field sites. The Green Belt is what makes Enfield such an amazing unique place to live and bring up kids. I think it is crazy that the council are choosing to built on the green belts to ultimately line their pockets for a quick buck. How many of the houses built in Trent Park are social housing, 0? The council plans to change crews hill, which is an experience enjoy soo many who like to use the nurseries. Shutting down pay as you play golf courses, and asking working class people yo play at some places like Bush Hill for 55pp is just alienating the working class. How many of the people within the council who make the decisions, actually live in Enfield, Breathe and appreciate the diversity that the green belt has to offer the Borough of Enfield.

Does Daniel Levy not have enough land in Enfield, that he requires a big expansion of the Spurs football training ground to the north of Whitewebbs Lane up to the M25, comprising of 42.5 hectares of land?

Crews Hill will never be the same if the plans for 3,000 new houses in a 'sustainable settlement' at Crews Hill with the potential for longer term expansion up to 7,500 new homes right up to the M25. Listen to the wishes of the people from Enfield!

I ask that you listen to the wishes of the people, and protect the green belt, for the future of our children, and the protection of the world. Building on the green belt, but planting trees in residential streets to make up for the loss is appalling. You are the same council who appeal to local people to do litter picks of local parks and rivers citing that getting out doors will help their mental health, but you are quite happy to takeaway the green belt which soo many local residents use, which means the impact of mental health issues is a lot lower than what it actually could be.

Please keep Enfield green, and fight the battle against climate change!
