

Dear Enfield Council

I am writing to object to the proposal of redevelopment of supermarket and car park to mixed use homes and no residential floor space SA 32 page 351 of Enfield local plan.

The loss of a major supermarket in the area will force people to drive further and increase car usage in local road. There will also be a wider impacts on the environment, traffic and local infrastructure.

This development will lead to the destruction of the green space which is especially useful for residents who live in the surroundings flats and do not have a garden.

The increase in vehicles on the road from potential residents of this development will increase traffic, which is already congested, and produce higher levels of carbon monoxide.

Without extra supporting community infrastructure planned, which doctors' surgeries schools and transport would these residents be accessing?
