

Dear Sirs,

I write to object to plans to site a Crematorium in the Green Space known as Firs Farm.

Firs Farm is a much used and important space for Wildlife and Sport. It contains a very popular wetland area, football fields and tennis courts. I should think it is unique in the Borough for its combination of green space and sporting facilities.

It beggars belief that such a 'green space' should even be considered for an alternative use let alone as a site for a crematorium.

If there is a need for greater capacity in crematoria I'd have thought that this could be met at the current site on the A10. Regardless, a green field space such as Firs Farm should be left well alone for anything other than improvement to its current use.

Please abandon such plans.
