

To whom it may concern

I have been a resident of Hadley wood / Hadley Green for 12 years.

One of the main reasons we decided to move here was because of the green spaces and the fact that it is nice and open and not too congested.

For this reason I object to the proposed site allocation of 160 homes on the green belt land.

We must save our green belt land because it is home to wildlife which will be forced out of the area and may even perish.

Our green belt is also needed for the residents of Hadley Wood as it preserves our mental health. One of the main reasons we loved it here was due to the fact that we could take long walks in those fields and woodlands.

At the moment we have enough trouble with traffic on Cockfosters road!

How do you propose that our roads will cope with 160 new homes being built in Hadley Wood?

Our roads will become congested and polluted. One of the reasons we decided to move here is because it was nice and peaceful.

This is an unsustainable development and unnecessary large scale deconstruction of green belt.

Our transport systems are not good enough to accomodate all of these people from the new homes.

There are not enough schools, shopping and leisure facilities, local public transport is poor and sewers are inadequate.

Finally I think that the local plan fails to develop and prioritise brownfield sites.

Therefore can you please remove this proposed site allocation from the next edition of the Local Plan and retain the green belt status for the land.
