

I am against this development for the following reasons:

- Loss of a major supermarket forcing people to drive further, thereby increasing pollution which is totally contrary to climate change initiatives.
- Increased housing will inevitably put further strain on current facilities which are already inadequate in terms of key resources, ie doctors, dentists schools etc.
- Local shops will see a decrease in footfall following the loss of the Fords Grove parking space along with restrictions on parking at Winchmore Hill Broadway.
- Increased carbon monoxide levels on this already congested part of Green Lanes.
- If this goes ahead, the whole area will become a construction site which will have massive repercussions for local and business traffic.

These plans **MUST** be rejected and an alternative site identified where the effects will be far less environmentally, health wise and aesthetically.
