

I am writing in support of the new local plan, which includes the necessary building of homes on green land and golf courses. As you say there is a huge housing shortage in the area with young people priced out of a home. Use of a small amount of the substantial area of green land in the borough is needed to deal with the crisis.

The only disagreement is in the topic of tall buildings and I think the borough could benefit from a few iconic towers of flats in proximity to the walkable centre and public transport hubs.

all the best,
