

Dear sirs

I have lived in Enfield all my life and so have many generations of family and appreciate our beautiful green spaces.

The beauty of Enfield is that we are the greenest Borough with so much heritage. I am asking this council to leave our greenbelt for further generations to enjoy unspoilt. Our parks should be protected and not built on ie Whitewebbs. Crews Hill Garden centres are visited by people from all over. Our town centre needs to be improved and not with more barber shops encourage artisan shops in Enfield Town look at St Albans the infrastructure is charming as well as the diversity of the shops. put Enfield back on the map with interesting shops, outside seating, cleaner streets too. Some parts of Enfield Town Chase Green and Gentlemans Row should remain untouched as they are part of our heritage. More care to our waterways ie Gentlemans Row the new river.

Culture:

This should be made available for everyone for all ages not just for children and young adults. Do not forget the older generation they are part of community too.

Make Enfield a place that the community is proud to live in. Tower blocks are not the answer.

Enfield people are proud of the quaint Ness that Enfield is. Enfield Town should remain the hub of the community that is where our civic centre is building on greenbelt we will lose our identity.

Transport and A10:

Improving better transport links ie buses around the Borough and reaching other parts easily without having to get two buses. A bus from Ridgeway to Forty Hall. Resolving the

A10 boy racers.

Better interaction with community groups. I run Enfield Matters it would be good to have a contact point/person that I can go to with any issues members have.

Schools:

The safety of children is paramount bring back lollypop ladies/gents. Reconsider the LTNs take note how the traffic floods on to other residential roads better monitoring.

With consultations listen to the community
