

I want to register my strong objections to the above plan . I have been a regular customer of this supermarket for a number of years and do not now want to be forced to drive further for my families weekly shopping needs ,which would result in me adding to local air pollution and traffic congestion. Replacing an essential local facility would not only make life more difficult for elderly and disabled residents but would cause severe disruption for residents , and in the absence of any plan to develop additional infrastructure to provide additional facilities for schools,GP surgeries, parking etc would put even more strain on existing over-streched facilities.
