

I do not agree with you building on green belt land around Enfield. It is a part of the benefits of living in Enfield that we have the green belt all around us and what a blessing they have been during the pandemic for so many of us. We live in EN1 in rented accommodation so when I write this you know it is not because the price of a house I might own may go down but simply that the benefits of the green belt are irreplaceable and certainly make living in Enfield a pleasure.
