

Dear Enfield Council, I objection to the plans to turn this into residential flats. There is already traffic congestion in the areas. It will be made worse. Pollution from vehicles would increase and impact the environment adversely. There would be a push on local services which are already overstretched. This includes local GPs, schools and hospitals. The grounds around Sainsburys have a variety of trees and greenery which would be destroyed. Green spaces are gradually disappearing in the local areas. They're so important to our mental health for adults and children. The architecture of the local area is being spoiled by tall blocks of flats which are congesting our areas and gradually cutting our view of the sky.
