

Hi,

I object the proposed plan, please see the following reasons:

1. The local infrastructure is not ready for the sudden increases of the residents, such as GP, dentists, and schools. This will cause inconvenience for the local residents.
2. In the light of global warming, the need to reduce carbon consumption. Building more property will certainly doing the opposite, for instance more cars, more pollution.
3. We should reserve the current not many green belts, preserve the character of the local area, and the local residents can have better quality of air, more outside exercises space, better quality of life.

Please reject this planning proposal.
