

Hi,

I write to express my absolute objection to building on the Green Belt. In the draft local plan it references the de designation of various parts of the Green Belt. Including the Vicarage Farm site. Building on the Green Belt is utter madness as these are not only the lungs of Enfield but also the lungs of London. We must protect our Green spaces for future generations.

I am also opposed to inappropriate development in the borough. This includes the failed policies of the past in building unsightly tower blocks that do not provide gardens for children and families to use to play and rest in.

Enfield has a distinct character as a town for families as a London suburb and this should be protected and maintained as such in perpetuity. I hope that the Council sees sense and listens to the responses of residents and alters the draft local plan accordingly.
