

To Whom it may concern,

I'd like to express my concern about building on top of the current Firs Farm Wetlands. This is a space now being used by many people seeking refuge from busy spaces in and around the area. Using it for exercise, space and to rest. It's also great for the environment to have such a space and it would be devastating to have it changed into something like a crematorium. Please re-consider your options for this space.
