

Dear Enfield Council,

I am writing to express my strong objection to the draft plan to convert Firs Farm playing fields \Wetlands to a crematorium. This is a much loved public green space and for my family and I is one of the best things about living in the area. I have been so delighted at how it had been converted to its current state and use it for exercise and leisure 3-5 times every week. It is also constantly used by young people for positive activities such as sport, which I believe should be encouraged. I understand the need for a crematorium but I politely encourage you to find an alternative site. My family and I would be so saddened to see the Wetlands and playing fields go.

I would be very grateful if the views of my family and I are taken into consideration.
