

Dear Sir/Madam.

I Object to policy DM BG6 on the grounds I have a large garden and would like one day to build a small house for my wife and I to live in for our retirement.

It will allow me to sell my main house, pay off my existing mortgage, pay for my new built and allow me a small financial pot to allow me a comfortable life in my retirement.

It is the only way I will be able to afford stay in the area amongst my family, friends and neighbours who i know will support me in my old ages.

Please consider this carefully.
