

To Whom it May Concern,

I formally object to the Local Draft Plan that specifically mentions DM BG10 for use of Firs Farm wet lands as a site for a crematorium.

As a local home owner (151 New Park Avenue, London N13 5NA) I do not believe that this is a good idea at all. I run multiple times per week during this fantastic space and during the lockdown period it was a life saver for my mental health. I don't think it would be a good location as it would affect the environment around me, it would increase traffic in a tight location already and it would be horrible for my neighborhood.

I also don't think that a proper environmental study has been done to assess the impact to wildlife.

This is a really bad idea.
