

Draft local plan objections

I am writing to object the redevelopment of Sainsburys Green Lanes N21, page 351 of Enfield local plan car park and redevelopment of supermarket.

To mixed used and residential,

This super market is very important to the community and I use this regularly, it is one of the only quality supermarkets with good parking, which can also be used to shop not just at Sainsbury's but to pop into the local parade of shops.

I believe that it would be a gross over development of the area, increasing traffic on the already congested roads.

Green lanes is already congested.

I object to SA42 the loss of the ford road carpark, as this was part of the cycle lane introduction and was promised to replace the car parking that was lost to the cycle lanes. It is also used to pick up and collect children from the day car which is next door, providing a safe area to collect and put young children in the car.

I object to policy Sa52 page 372, which would kill wildlife and public amenities by Ramney Marsh. As covid has proved we need greens spaces more than ever and wild life need a sanctuary.

I object to SA62 Whitewebbs which removes a public amenity into private management, on the basis that whitewebbs golf course was losing money,

I object to policy DMBG10, conversion of recreations field to crematoria farms loss of wetlands, a sanctuary for wild life
