

Good evening,

It has come to my attention Enfield Council have proposed to eliminate the Green Belt in favour of housing.

I am unsure as to how this will be of any benefit to any current or future residents of Enfield due to my following points:

Lack of green space - beneficial for both mental and physical as well as protecting our environment (where in multiple agreements have been pledged and signed to improve)

Removal of infrastructure - by removing both Tesco's, Sainsbury's, Marks and Spencer's, Morrison's, Palace Gardens and Edmonton Green shopping centres how do you propose local residents to do their shopping? Majority of over 65's won't use online shopping and it will also increase the use of online shops, therefore less slots available. This in turn will not only increase congestion and driving but it will also turn away potential residents and families as Enfield will be completely shut off.

Why would the council be receiving money for the removal of these?

I understand the need for more housing but there are multiple empty office spaces and warehouses that could be utilised.

Just to confirm I object to the proposal put forward.
