

I object to the destruction of the green belt in Oakwood and Enfield.

For the following reasons:

Nature is limited as it is in London

The wildlife will be affected

The future generations will be affected

Climate change

Over population

Co2 emissions due to more people, more cars on the road

Property value decreasing due to area going downhill

Schools are already over populated as it is without an influx of more families

The endless disruption to the locals who have to deal with the constant noise pollution caused by the construction of these new developments

Please re think your strategy
