

Hello i'm lucky enough to of experienced 14 years of the brilliant green belt and I am extremely disappointed and upset to hear that there has been a plan to build 3,000 houses on Vicarage Farm. I believe that this plan should focus on developing under used run down areas such as Industrial Estate where there is a lot of vacant buildings, improve them and make use of what is already there. I also believe that the increase of housing around the area will have a serious impact on the traffic problems there is around my area as it is already severely hard to get out of my road everyday. I also believe there isn't enough green space in this area for example there is not a park or public sports ground in the ward where i live. I use the green spaces regularly and have learnt a lot about nature and the environment and how important it is to all the people who live in Enfield. Also my scouts group hut is on this land and plays a critical role in my education as-well as my mental health. The Plan is taking homes away from innocent creatures as well as destroying our own lives. If the Plan goes ahead the government will live to regret their decisions. i will fight the local plan
