

Dear Sirs

We write to object to the proposals to develop areas of green belt at Vicarage Farm and Crews Hill. Our reasons are:

1. The loss of countryside within the borough which is an important amenity for all residents in Enfield to enjoy and appreciate. The necessity for green open space for the general well-being of the community has been brought into sharp focus during the current pandemic.
2. The scale of the potential development (especially at Crews Hill) will have a severe adverse effect on the character of the area and will lead to an unwelcome incursion into a part of the borough which is enjoyed by those seeking recreation in the midst of open countryside.

We also have concerns about the new height limits for buildings within the close proximity of transport hubs as it could give rise to the construction of buildings which are totally out of character to the surrounding area.
