

Good evening

1. I am writing to object to the following Policies: SP PL10, pages 80-87, and Figure 3.11; Policy SP PL9, pages 77-80 and Concept Plan Figure 3.10; Policy SA45: Land Between Camlet Way and Crescent Way, Hadley Wood, page 364; Policy SA54, page 374; and Policy SA62 page 383 and SP CL4 pages 277-279 – all of which propose the dedesignation of Green Belt for housing and other purposes. These sites are part of historic Enfield Chase, which is unique in the southeast and played an important role in the development of Enfield. It is a rare and valuable landscape asset and its loss would cause permanent harm not only to the Green Belt, but also to the very character of the borough.
2. I also object to Policies SA62 page 383 and SP CL4 pages 277-279 because they transfer part of Whitewebbs Park, a public amenity, into private management. I reject the Council's analysis that Whitewebbs Golf Course was losing money and call for its reinstatement.
3. I am also objecting to Policy SA52 page 372, which would remove part of Rammey Marsh, a wildlife area and public amenity, from the Green Belt.
4. I am also objecting to the tall building policies on pages 156-160, Figure 7.3, Figure 7.4 and Policy DE6, and SA2 Palace Gardens Shopping Centre page 321 which propose areas for and the acceptable height of tall buildings which, in many cases

would mar the landscape and are unnecessary because other lower-rise building forms could provide the same accommodation, as stated in the policy.

I live in the area and I have PTSD, I rely on the surrounding green belt areas to decompress from my PTSD as do a few of my ex military colleagues,

We walk our own dogs and dogs for other people and observe wildlife, these areas are crucial for Veteran soldiers such as myself to escape the concrete jungle and to be free to enjoy nature and tranquility.

I believe the green belt and such areas are highly beneficial to those with mental health issues such as PTSD and many other trauma or anxiety related mental health issues.

The green belt also houses natural habitat for many species of wildlife, especially of certain butterfly species, and bees, those of which are imperative to be kept in their habitat to benefit local plantlife which also in turn benefits the environment, without these we would suffer greater impact from global warming, the eco system would also be deeply impacted in a time of climate emergency destroying green areas is most certainly not a smart move. We have very little left in terms of nature and wildlife in the UK and to destroy more of it will only ring disaster in the future.

I would also like to consider future generations, if we keep destroying these areas when will it stop? when will we see the point where our children no longer know what trees are? This generation doesn't even know where a chicken actually comes from, just that monopolies like TESCO sell them on the shelf as pre pack. Are we looking at a future where everything is pre pack? When is it going to stop?
