

---

Dear Enfield Council,

The following are my 10 point objections to the your proposals for the Enfields Local Plan 2019 - 2039.

1. 25,000 new homes create a massive construction carbon footprint and is not necessary.
2. The number of cars that will be used by the occupants will bring Enfields roads to a grid lock. The creation of those cars adds to the carbon footprint in addition to the fuel that is needed to run them. Anyone who has tried to travel in Enfield in rush hour knows this.
3. Enfields infrastructure is at saturation point. The roads are full, there are inadequate GP facilities, hospitals, schools.
3. Building 6000 new homes on the Green Belt is totally unacceptable. There are plenty of brownfield sites and Meridian water should be completed first.
4. The Green Belt is one of Enfields most important assets. It is what makes Enfield a pleasant place to live. It is the lungs of the people that live and work here. It is our heritage. Once destroyed it cannot be brought back again.
5. You have already disgracefully sold off Whitehebbes. You were entrusted to look after it for the people of Enfield and you have let us down. Allowing Spurs to expand excludes the people of Enfield having access to Whitehebbes.
6. The proposals are developers charter. They do nothing for Enfield residents. They do not improve access to nature. We already have good access to nature and your proposals will take much of this away.
7. Vicarage farm, New Cottage Farm and Holly Hill farm should be farmed. There are few farms within the M25. Here is an opportunity for this to be farmed and produce to be sold locally thereby reducing food miles.
8. Enfield Chase is of historical importance and should remain intact and not covered in concrete.
9. Crews Hill garden centres attract people from all over north London and Hertfordshire. More focus should be given to ensuring this area thrives as a golden mile if garden centres.
10. Tall buildings are a blight. They are intrinsically dangerous to anyone who has the misfortune to have to live or work in them. They cast a shadow on their surroundings and are oppressive. They are detrimental to peoples well being and in particular their mental health. They are unacceptable within or bordering Conservation Areas.

Please think again before you ruin Enfield.
