

Hello

I wanted to log my strong objection to this plan.

This is a huge amount of new homes being proposed with no corresponding plan to increase infrastructure such as more medical services and schools, which would lead to a huge issue to already overstretched services in the local area.

The excess traffic pollution and strain on public transport in the area is also unacceptable, along with the destruction of woodland and 'at risk' animals habitats.

For the sake of preserving our local area and quality of day to day life, I absolutely recommend this project is not undertaken.
