

Dear Sirs

I would like to make my objections to the building of 299 New Homes on the current Sainsburys site in Winchmore Hill N21

With Capitol House being redeveloped, plus these new homes - where on earth would local people do their Shopping. Many people – the elderly and school kids walk to Sainsburys at the moment .The only other option is a much smaller Sainsburys in Highlands Village or Morrisons. Or of course we could use our polluting cars to drive even further to go to Sainsburys on the A10.

There is no community Infrastructure planned to we will be stretching schools and doctors surgeries even further.

An increase on vehicles on the road from these residents will inevitably increase pollution and have an impact on our community , environment and children.

Fords Road car park will be going soon , so where is everyone meant to park in order to visit the local shops in Winchmore Hill? At least we could park in Sainsburys and visit those shops, before returning to do the main shop in Sainsburys.

The development will lead to destruction of habitat and woodland, and when Sainsburys was built in 1996 there was a clause stating that the woodland/ habitat would be maintained for the community. I also object to the removal any trees surrounding Sainsburys, to make way for this development.

One assumes Enfield council will be better off financially by disregarding this clause by being open to offers from potential property developers!

This is an inappropriate site as it will lead to over development in this area.
