

Response to the Draft Local plan Reg 18.

1-9-2021

Dear Enfield council,

I am not going to list the policies, because you know them!! What in heavens name make you feel the proposed sites are suitable for new Housing!!

The sites are of great value for our physical, mental and social well being.

If the pandemic has taught us anything its the need its get out and enjoy the countryside, we are being encourage its enjoy nature and what is on our doorstep. The need for housing is important and I appreciate that fact, but situations have changed, that so much office space is no longer needed and I can't believe there isn't suitable brown sites.

Local court in London Rd has proved with abit of thought offices can become suitable homes, with more people working from home the proposed sites are even more precious.

In recent months I've had a woodpecker and Redleg hog in my garden, something I have not seen for many years, if nature is fighting back then so must we. Please please for the future of generations to come and now reconsider.

Kind regards,
